Katalog plus – Other Features

Search History
- „Search History“ automatically records the last 50 of your search queries.
- Older entries are replaced by new ones as soon as 50 are reached.
- Without prior login to the Katalog plus the list expires at the end of the session.
- You can store 50 search queries permanently:

<td>50</td>
<td><img src="image" alt="Delete" /></td>
</tr>
</tbody>
</table>

Create List Without Login (list is not saved, expires at the end of the session)
- By clicking on the star 🌟 to the right of the hit list, the titles are added to the list.
- Titles are deleted from the list by clicking on the star 🌟 again.
- On calling up the list, following features are offered:
  
  - Sending selection via email: After selecting an export format, the title can be sent to an email address.
  - Exporting selection as file: Previously selected titles can be exported in different formats, e.g. for transfer to a reference management system.
  - Printing selection: Previously selected titles can be printed from the list via the print feature.
  - Deleting titles from list: Previously selected titles can be deleted from the list.
  - Emptying list: Via the feature „Empty list“, all titles can be removed from the list.

Create List With Login (list is saved, can be called up again)
- By clicking on the star to the right of the hit list (after selecting the respective list), the titles are added to the list.
- You get access to your lists by logging in with your user code.
- Several lists with individual names and content details can be created.
Adding a Title to the List
